

OPM Cybersecurity Incident

- ▶ In April 2015, OPM became aware of a cybersecurity intrusion affecting its information technology (IT) systems and data.
- ▶ The intrusion occurred in December 2014.
- ▶ OPM will send notifications to at least 4 million individuals whose PII may have been compromised.
- ▶ OPM will offer credit report access, credit monitoring and identify theft insurance and recovery services at no cost to them, through CSID®, a company that specializes in identity theft protection and fraud resolution.

OPM Cybersecurity Incident

- ▶ Credit monitoring service and identity theft insurance offered through CSID, a company that specializes in identity theft protection and fraud resolution. All potentially affected individuals will receive a complimentary subscription to CSID Protector Plus for 18 months. Every affected individual, regardless of whether or not they explicitly take action to enroll, will have \$1 million of identity theft insurance and access to full-service identity restoration provided by CSID until 12/7/16
